Summary

Software Engineer with 5+ years of experience building and scaling distributed systems using **Java, React, .NET, AWS, and Azure**. Proven track record of owning end-to-end feature delivery, improving system reliability, and optimizing cloud infrastructure.

Skills

Languages: Java, TypeScript, JavaScript, C#

Frameworks: Spring Boot, React.js, Node.js, .NET

Cloud/Infra: AWS (Lambda, ECS, S3), Azure DevOps, Terraform, Docker, CI/CD

Databases: PostgreSQL, MySQL, MongoDB

Concepts: Microservices, REST APIs, Distributed Systems

Experience

Openlane Inc.

Jun 2021 – Present

Senior Software Engineer

- Designed and deployed **5+ microservices** (Java/Spring Boot) supporting scalable platform features.
- Owned **end-to-end delivery** of key features (Watchlist, Lost Tab, Sold Tab) from design through production.
- Built search and bid-history APIs over large datasets (10K–100K+ records), improving performance and reducing UAT defects.
- Reduced deployment time from **hours to minutes** via CI/CD pipelines and infrastructure automation (Terraform, Azure DevOps).
- Improved production reliability by **reducing incidents (20–30%)** through proactive debugging and service stabilization.
- Migrated legacy pipelines to YAML-based workflows, standardizing deployments across teams.
- Optimized infrastructure by resolving memory and performance bottlenecks in search and pricing systems.
- Implemented secure authentication flows using **RSA encryption** across distributed services.
- Delivered Carfax (RIMS) integration using React + .NET, including infrastructure setup and feature development.
- Introduced engineering improvements including AI-assisted PR reviews and read-only DB access patterns for production safety.

Performance Auto Group

Oct 2019 – Jun 2021

Software Developer

- Replaced manual workflows with a web-based system, saving **300+ hours/year**.
- Built backend services using Spring Boot and designed relational database schemas.
- Developed real-time dashboards and scalable frontend applications using React.

Project

IoT Occupancy Platform (Node.js, MongoDB)

- Built a SaaS platform processing real-time sensor data with REST APIs and visualization layer.
- Led a team of 5 to deliver MVP on schedule.

Education

- Graduate Certificate, Information Technology Solutions - Humber College
- Bachelor of Technology, Computer Science - Charotar Unirversity, India
